

Dr. med. Bettina Hederer

Specialist physician for general
internal medicine (FMH)

Specialist physician for pneumology (SGP)

Since 1 August 2020, Dr. Bettina Hederer has been working as a family doctor at the Rosenpraxis group practice. Dr. Hederer has many years of clinical experience in the hospital sector and has worked as a general practitioner in Germany as well as in the Cantons of Aargau and Schwyz. She has additionally worked in medical research in the fields of respiratory diseases, inflammatory rheumatological diseases, cardiovascular diseases and neurology. She completed her training in internal medicine and pneumology at the St. Willibrord hospital in Emmerich, Germany. In addition to general medical diseases, Dr. med. Bettina Hederer treats pneumological diseases, such as asthma and COPD, as well as inflammatory rheumatological diseases.

I attach great importance to building a relationship of trust with my patients. Your personal needs are always at the forefront. It is my prime concern to offer you competent and comprehensive medical healthcare. You can rely on my training as a physician for internal medicine and specialist training in pneumology, plus my many years of professional experience. I look forward to getting to know you in person and thank you sincerely for your trust.
